

True H13 HEPA Filters

Medify Air purifiers contain True HEPA filters that remove 99.9% of airborne particles down to 0.1 microns. Cleaner indoor air has been shown to improve cognition and productivity, reduce the spread of airborne diseases, protect against outdoor air pollutants, such as smog and wildfire smoke, and decrease the number of environmental triggers for conditions like asthma and allergies.

1

Pre-filter removes hair, dust, and large particles.

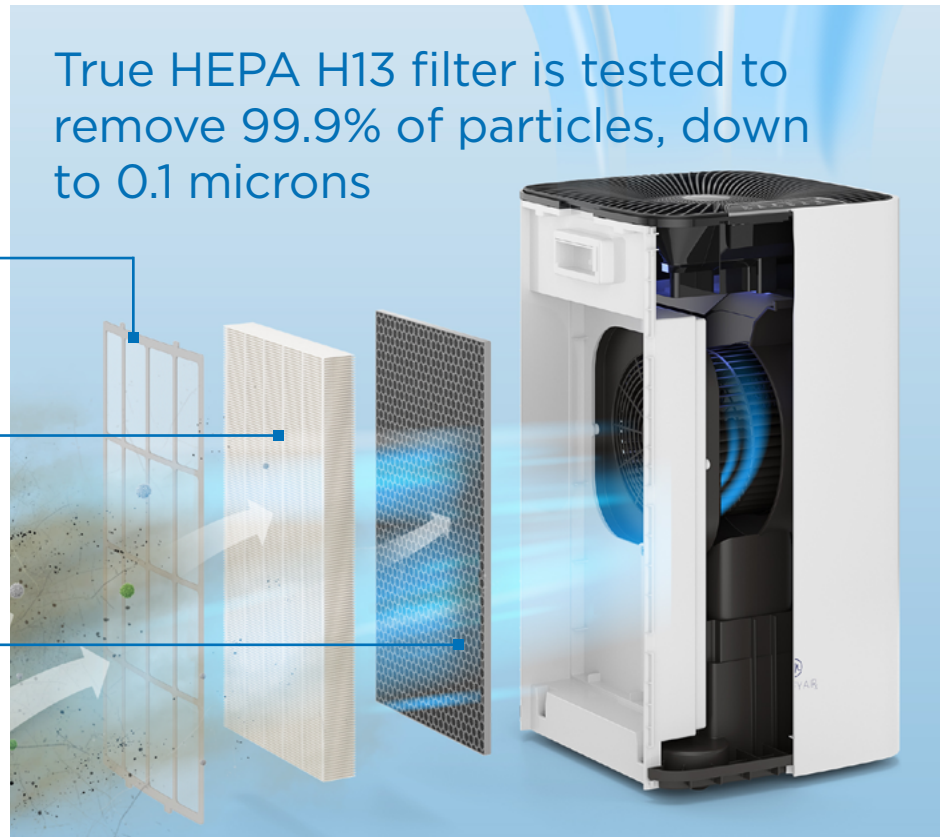

2

True HEPA H13 filter removes pollen, allergens, and more, down to 0.1 microns.

3

Substantial carbon filter with carbon pellets absorbs odors, VOCs, and smoke

True HEPA H13 filter is tested to remove 99.9% of particles, down to 0.1 microns

It is important to change the filter with Medify Certified Filters. Most units require a filter change every 2,500 - 3,000 hours. This not only maintains your purifier's Lifetime Warranty, but also ensures the air quality remains clean and healthy. The best way to stay on top of the filter changes is to stock up with your initial order or schedule filter delivery.
